

# Why choose Q-global®?

Q-global, is a web-based scoring and reporting system that also allows you to deliver select, self-administered tests on any device connected to the internet.

Q-global is used for the self or proctored on-screen test administration of many of Pearson's rating scale- or questionnaire-type assessments. Secure and easy to use, Q-global also allows you to enter results from paper-and-pencil tests to generate scores and reports with the convenience and flexibility of a web-based system. For select tests, Q-global also allows for group administration and the import of scan files for batch scoring and reporting, as well as access to digital assets like administration and technical manuals.

Q-global is...

- **Portable**—Scoring and reporting from any device connected to the internet.
- **Efficient**—Facilitate many assessments on-screen in your office, or email a link to a rater or examinee to complete remotely.
- **Economical**—Purchase report usages as needed or save with unlimited-use scoring subscriptions for paper administrations.\*
- **Extensive**—Scoring for more than 65 assessments available, many offering on-screen administration.
- **Flexible**—Generate scores and reports for individuals or groups.
- **Comprehensive**—Reliable, online reporting solutions including interpretative and group reports.
- **Secure**—Meets security requirements with data encryption.

*\*Available for some assessments.*
